

User response

Engineering Notes

Explore name validation options. Prevent profanity names (swear words?). Engineering to advise if a confirmation message should be included.

Data Science Notes

Contact field: profile\_name (user response)

mmch\_onboarding\_domains\_01

Domains\_01

Great to meet you (@username)!  
I have TONS of information on lots of different topics to share with you!  
But I want to know what topics YOU'RE interested in adding to your profile. I have some suggestions for you to pick...

Let's go!

Engineering Notes

Omit user name here and throughout the flows where it's used if no user name provided.

Engineering Notes

This step should be skippable for implementations with focussed domains; MNCH/SRH/HCW

Data Science Notes

Contact field: onboarding\_topic (pregnancy, baby and child, general health, love and life, safe sex, info for nurses)  
Note: don't save selection directly due to emojis

mmch\_onboarding\_domains\_02

Domains\_02

\*Love and relationships\*  
Everything you need to know about finding love, flirting, having healthy relationships, getting out of bad relationships and communicating better with a partner

+ Add this topic

mmch\_onboarding\_domains\_06

Domains\_06

\*Family planning\*  
You have the power to decide if and when you want children, how many and how often. You might want none. You might want lots! What matters is that you have the right to decide and know your options!

+ Add this topic

Not interested

mmch\_onboarding\_domains\_07

Domains\_07

\*Info for health professionals\*  
Are you a nurse or volunteer healthworker? Access resources and training to boost your knowledge and skills.

+ Add this topic

Not interested

Engineering Notes

The health domains must be prioritised, e.g.  
1. Pregnancy  
2. Info for health professionals  
3. Well-being / family planning / baby- and child / love and relationships  
If a user has selected more than one domain, send the user to the highest priority onboarding flow first.

SXD Notes

We should add some kind of "success" message if people add a topic, as acknowledgement
